A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/18/04 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 13-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Larson et al and Desu et al.

The rejection is maintained as stated in the paper mailed 11/20/03. It is not necessary for the reference to disclose that the process of the reference is performed to achieve the same goals as applicant or to obtain the same advantages recognized by applicant. It is sufficient that the process suggested by the reference alone or in combination with the remaining references is encompassed by the instant claims. Layer 40 would behave as argued in the process of the combination because the same materials would be treated in the same manner as in the instant invention.

Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Larson et al and Desu et al as applied to claims 13-18 above, and further in view of Hsu et al.

The rejection is maintained as stated in the paper mailed 11/20/03.
